Overall, MCC continues to have a higher number of male staff than female staff, maintaining a gender split of two-thirds male to one-third female, however, the workforce moved towards greater female representation for the first time with a 3% increase on the previous year.

Whilst MCC’s Gender Pay Gap has increased since the previous year, the Club has a small gender pay gap, in comparison to similar organisations, well below the national average.

**PAY GAP**

The tables below show MCC’s mean (average) and median (middle) pay gap for hourly pay and bonus as at 5 April 2023 (Snapshot Date).

Mean gender pay gap

The mean gender pay gap increased from 6.21% to 9.17%. This can be ascribed to three factors: 1) the overall increase in the number of staff, including casual workers, 2) more junior salaried roles being filled by proportionally more women than the Club-wide average, and 3) the departure of two senior female employees, one of whom was replaced via an internal promotion within the organisation rather than a new hire.

Given MCC’s size as an organisation, it is important to note that even minor structural changes can lead to significant shifts in its annual reporting outcomes.

Median gender pay gap

MCC’s median pay gap also increased, from 7.86% to 9.37% in favour of male employees. The Club attributes this rise to its increase in workforce, most notably the engagement of 113 new casual workers.

National Average comparison

MCC’s mean and median gender pay gap continues to be better than the National Average. The ONS reports that among all employees the national average gender pay gap in April 2023 was 14.3% (median) and 13.2% (mean).
BONUS GAP
Details for bonuses for employees relate to a 12-month period from 6 April 2022 to 5 April 2023 (inclusive) and are set out below.

*Mean and median bonus gap*
MCC’s mean bonus gap increased in line with headcount, with an approximately 50% increase in those receiving bonuses for both males and females.

The proportion of males and females receiving a bonus is very similar, with slightly more male employees receiving a bonus than their female colleagues.
